

AI & Machine Learning Sample Notes

What is AI?

Artificial Intelligence enables machines to perform tasks that normally require human intelligence such as learning, reasoning and decision making.

Machine Learning

Machine Learning is a subset of AI where computers learn patterns from data to make predictions.

Types of Machine Learning

Supervised, Unsupervised and Reinforcement Learning.

Data Preprocessing

Cleaning missing values, encoding categorical data, scaling numerical features and splitting train/test data.

Classification

Classification predicts categories such as survived/not survived in the Titanic dataset.

Evaluation Metrics

Accuracy, Precision, Recall, F1-score, Confusion Matrix and ROC Curve.
